DREAM OF NEWS.

Differences Adjusted.

On Monday the entire police force—officers Twyman, West, Vinson and Fritz—tendered their resignations to the city Council and filed therewith a list of complaints against Chief Campbell. The Kentuckian investigated the matter and found that the complaints or charges were of a trivial nature and the outgrowth of a difference of opinion in regard to the details of the work of the officers, and hoping and believing that these differences could be adjusted, no effort was made to make a sensation of the matter. The Council met Wednesday night to consider the resignations and after the parties concerned had discussed the matter with the Board, a thorough understanding was arrived at, the resignations were withdrawn and everything was amicably adjusted. This was the proper and sensible course to pursue and the wise and conservative officers of the Chairman Hill had much to do with bringing about the settlement. Chief Campbell is an officer who discharges his duty faithfully and the Council as well as the people appreciate his value as an officer. At the same time he has a force under him of whom the city is justly proud. They are all sober, discreet, conscientious and courageous officers, who are fast making a reputation for themselves as a model force. Their places would be very hard to fill and the city could ill afford to lose their services. It is a matter of the utmost importance that there should be no dissensions at this time and the city's best interests have been subserved by the settlement on a friendly basis of all differences between Chief Campbell and his men.

An Organ to Foster and Protect.

Dr. Thos. Foster, formerly of Du-luth but more recently of Nashville, has decided to set on foot a red hot Republican organ in this city. It will be an eight column weekly, printed on a hand press and the office will be located over Mr. A. H. Anderson's grocery on Virginia street. It is expected to be ready to start within two weeks and it is understood that the local Republicans have given some sort of guaranty to induce the proprietor to come to Hopkinsville. Dr. Foster is an old gentleman about 50 or 60 years of age and has had a good deal of experience in newspaper work. As the new venture is to be a strictly party organ, it may be expected to be in thorough accord with the ideas of the bitterest partisans among the Republican leaders.

Blood Spilling at Bennetts town.

On Sunday afternoon Ennis Lewis and Jim Rucker, had a drunken fight near Bennetts town. Rucker was shot in the neck and badly hurt and Lewis was stabbed in the side and cut on the arm. Neither will die.

The Directors of the Driving Park Association have decided to hold a Spring Meeting the latter part of May, provided they can raise a sufficient amount from donations to help defray the expenses. A committee has been appointed to wait on the business men in regard to the matter. The meeting will very likely be held as all of our citizens realize the importance of a fair that would draw a large crowd to the city. It would not be on as large a scale as the last meeting, but the premiums would be sufficiently large to cause some due stock to be brought. The meeting would come at a very pleasant time of the year and would undoubtedly be largely attended.

Help to the Commercial Club is help to ourselves, and to every enterprise started within the city's limits or in its vicinity.

THE EAST AND WEST.

A Very Nice and Delicate Question is, Ethical Geography.

If there is, as legend says there is, such a thing, seen through Western eyes, as an "effete East," what are its precise territorial limits? In other words, where does such an East really end and the West begin? Or, to state it still differently, at what point on the map may one, if so disposed, put one's finger confidently down and say: "Here is the spot where the effete of the arrogant East abruptly ends, and in its stead is the unexpended fecundity of a liberal, untrammelled West?" While the matter is not one that will, apparently, in the immediate future give rise to serious international complications, it is, for instance, of no little domestic moment, and may, at some distant day, even call for State interference and adjudication at the hands of a boundary commission, to be chosen from the impartial outlying districts in the extreme North and South.

In reality, the problem of geographical separation would be one extremely difficult to solve to the complete satisfaction of all concerned. It is, for instance, not merely a broad question between Maine and Oregon, between Eastport and Portland, or even, possibly, between New York and San Francisco. On general grounds, it might be admitted that somewhere in the intervening space the line would certainly fall. On a somewhat closer examination, however, it will be found that facts other and more minute than mere latitude and longitude must be seriously taken into consideration. It may even be not unfairly assumed that the fundamental idea of East and West itself is only relative, and can not be thus recklessly applied. Schenectady, where Daisy Miller lived, is west of Jersey City; and we all know that Oshkosh lies far to the westward of Kalamao. If, in the inquiry thus set on foot, the reasons for the necessary distinction were still more closely inquired into, it might even be shown that they who have thoughtlessly used the epithet in question themselves may fall under its ban.

When the division is finally made, it must be wholly irrespective of any mere sectional prejudices, to which it should give no answer. The West, it may be supposed, will accept the judgment joyfully; while the East, from the very nature of the case, will be sure, wherever the line is drawn, to regard it with its accustomed equanimity. Only those who, in a possible redistribution, may now for the first time be included under the term "East" will become even a little more intolerant than they who have longer borne the name. For purely practical reasons, apart from mere sentiment, the distinction here suggested ought soon to be made. It was on the island of Grand Manan, down in the Bay of Fundy, last summer, that a comment was made upon the scarcity in the community of young people of both sexes. "How is it," we asked, "that we see so few young men and women here?" "Well," the captain replied, "a great many have married and gone west." "West?" we said. "To what part of the West?" "Well," said the captain, "mostly to Boston." — Atlantic.
